Connecting the World

The 4 key factors of a successful global product.

- ELECTRICAL CONNECTIONS VEHICLE / TRAILER
- SWITCHES ISOLATORS
- BATTERY CABLES AND ACCESSORIES
- ELECTRONIC BATTERY CHARGER
- EMERGENCY STARTERS
- TRAILERS TESTER
- SAFETY SIGNS FOR COMMERCIAL AND INDUSTRIAL VEHICLES

Quality

Quality is visible in our products, materials and checks during manufacturing and post-production, as well as in our service and technical support. **Quality to make work easier and improve users life.**

Research and Development

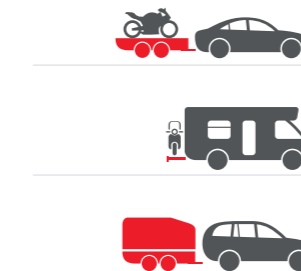

Member's products are designed based on a logic that ensures efficient performance and reliability over time, whilst retaining a constant focus on design. Over the years Member's patented various kinds of technology and new solutions to ensure its products are increasingly reliable and innovative.

Design

Member's products stand out for their design, which conveys both sturdiness and strength, along with a dynamic and functional touch. Designed to be user-friendly.

Certified Technology

All products by Member's undergo important mechanical wear tests and are certified in authorised labs for the purposes of safety standards. Using certified materials means we can provide safe installation for any kind of application, even the most extreme one.

CELU

Wiring cables with trailer electronic control module. Kit for cars and camper.

7P ISO1724
13P ISO11446

Member's wiring kit and trailer control module are a simple and effective solution for the trailer lights driving, both on cars and camper, without any load for the vehicle electrical system.

Build with technologically innovative and high-quality components which increase the reliability and the long-life of the product.

Wiring kit with cables and socket 7 or 13 poles connect perfectly the vehicle lighting indicator with the trailer.

Member's Technology avoid that the trailer lights cause:

- Error signal from the car check-control
- Nonfunctional of the vehicle electrical system

Member's Trailer control modules are suitable for:

- Cars with light bulbs
- Cars with LED lamps
- Camper

☞ Trailer control modules purpose is the vehicle rearfog light switch off when the trailer is connected and the rearfog function is on. Depending on the trailer control modules type, there can be further and different functions.
