Description

Wiring cables with trailer electronic control module for cars and campers.

Littelfuse wiring kit and trailer control modules are a simple and effective solution for the trailer lights driving, both on cars and camper, without any load for the vehicle electrical system.

Built with technologically innovative and high-quality components which increase the reliability and the long-life of the product.

Wiring kit with cables and 7-pole sockets connect perfectly to the vehicle lighting indicator with the trailer.

Features and Benefits

- Standards: Conforms to ISO 1724 recommendations and standards.
- Error signal from the car check-control
- Trailer control modules purpose is the vehicle rearfog light switch off when the trailer is connected and the rearfog function is on. Depending on the trailer control modules type, there can be further and different functions.
